Run

trainer.py

```
def load_checkpoint(self, step):  
    params = mx.load(f"/Users/kelvinnguyen/Projects/virtual_mc2/tts/local_f5/model.safetensors")  
    self.model.load_weights(list(params.items()))  
    self.model.eval()
```

Particular for streaming
answer in English

Optimized with prompting

TRAINING PROCESS

F5-TTS

Dataset: Emilia-English

Small sample : \approx 25 h audio from 46k hours

Training period: \sim 17 days

E2/F5 TTS Automatic Finetune

This is a local web UI for F5 TTS with advanced batch processing support. This app supports the following TTS models:

- [F5-TTS](#) (A Fairytaler that Fakes Fluent and Faithful Speech with Flow Matching)
- [E2-TTS](#) (Embarrassingly Easy Fully Non-Autoregressive Zero-Shot TTS)

The checkpoints support English and Chinese.

For tutorial and updates check here (<https://github.com/SWivid/F5-TTS/discussions/143>)
